Tellurian Biodiesel and Golden State Foods
Launch Los Angeles Biodiesel Storage and Distribution Terminal
New Location to Offer High Quality Biodiesel to Southern California

LOS ANGELES, CA, Sept. 8, 2008—[Tellurian Biodiesel](#), a leading independent distributor and marketer of sustainable high quality biodiesel, and [Golden State Foods](#) (GSF), one of the largest diversified suppliers to the quick-service restaurant industry, are jointly launching a new biodiesel storage and distribution terminal here under an agreement signed by the two companies earlier this year.

The new venture, located at DK Environmental storage and rail facility south of downtown Los Angeles, is slated to begin operations later this month. It will provide high quality B99 biodiesel to fuel distributors and other wholesale customers throughout Southern California. The terminal's 3-acre site is served by two railroads and allows for multiple tanker truck staging as well as accurate and timely transport loading.

Tellurian and GSF recently announced another joint venture, Encore BioRenewables, which will build its first production facility in Southern California to convert used cooking grease and other recyclable domestic fats and oils into biodiesel. Once this plant is on line a portion of its production will be marketed through the new Los Angeles terminal.

Upon opening, the terminal will begin the BQ-9000 Marketer accreditation process, a quality assurance program administered by the National Biodiesel Board. Plans call for additional distribution facilities throughout the U.S. as the market develops.

Tellurian currently toll manufactures biodiesel at multiple plants around the country and, together with GSF, is developing domestic markets with regional and national distribution partners.

The high quality biodiesel marketed through the new terminal will be sold to trucking companies, municipal fleets and to GSF to fuel its distribution fleet, which services customers in the quick-service restaurant industry.

The terminal's throughput is expected to increase as California's demand for renewable biodiesel continues to grow with the implementation of the Low-Carbon Fuel Standard and accelerated transition away from foreign oil.

"Opening this terminal ensures that our customers will have access to a reliable supply of high quality, sustainable biodiesel as California's Low-Carbon Fuel Standard is implemented," said Joe Gershen, Tellurian's vice president of sales and marketing. "Once again, Golden State Foods is taking a leadership role in the widespread adoption of sustainable biodiesel, a cleaner, domestic, renewable fuel ready to help keep Southern California's trucking industry rolling."

"This new joint venture will represent the first concrete step forward in our shared plans to manufacture and distribute sustainable biodiesel nationwide," said Mike Geisler, general manager of GSF's Strategic Sourcing Alliance division. "Our collaboration with Tellurian Biodiesel has been a gratifying success."

About Tellurian Biodiesel, Inc.

With offices in Los Angeles and San Francisco, Tellurian supplies the food service, manufacturing, entertainment and technology industries with biodiesel and biodiesel education. It has worked with several municipal fleets as they transition to using biodiesel, including those in the cities of Santa Monica, San Francisco, Inglewood and Beverly Hills.

With a dedication to the environment and a focus on the use of recycled materials and local sources whenever possible, Tellurian is developing biodiesel production facilities throughout the United States. It has gained a national reputation for its commitment to quality, value, service and sustainability. More information: www.TellurianBiodiesel.com or (310) 314-8246.

About Golden State Foods

Golden State Foods is one of the largest diversified suppliers to the quick service restaurant industry. Headquartered in Irvine, California, the \$3.4-billion company is value based with proven performance in superior quality, innovation and customer service. With nearly 3,000 employees worldwide, its core businesses include custom distribution services, processing of liquid and meat products, produce and bakery businesses. The company also runs a national nonprofit organization, the GSF Foundation for Kids. More information: www.goldenstatefoods.com or (949) 252-2000.
